

Biography:

Gilbert Z. Murimwa is a PGY-5 General Surgery Resident at UTSouthwestern Medical Center. He was born in Zimbabwe, but raised in Florida where he received his undergraduate, graduate, and medical training. As a resident, he has completed a 2 year research fellowship during which he conducted basic and translational research exploring novel therapies for pancreatic cancer based on exploiting the tumor microenvironment. In his clinical research he has published extensively on social determinants of health and access to care obstacles for patients with hepatopancreaticobiliary malignancies. After completing a fellowship in complex general surgical oncology he would like to serve patients through his work at the bench and bedside as well as in the operating room and community.
